Dutch Bros Coffee – Marketing Segmentation Questionnaire.....	16

I. BACKGROUND AND RESEARCH OBJECTIVES

Dutch Bros Coffee was founded in 1992 in Oregon and has become one of the fastest-growing drive-thru coffee chains in the United States. Its brand identity is centered on energy, friendliness, and community connection. Dutch Bros has created a loyal following, particularly among younger consumers and generations. However, as the specialty coffee market continues to evolve and competition intensifies with brands like Starbucks, Dunkin', and local artisanal cafes, Dutch Bros faces new challenges in maintaining differentiation and deepening consumer loyalty across diverse customer groups.

While the company's growth has been fueled by its distinctive "fun and friendly" culture, the market landscape reveals widening variations in customer motivations. Purchase behaviors and perceptions of value. Some consumers prioritize convenience and speed, while others seek unique flavor combinations and experiences, or they even just align with Dutch Bros' energetic, social brand personality. Understanding these underlying differences is essential for optimizing marketing strategies, product innovation, and brand positioning.

To compete effectively in this crowded, ever-growing marketplace, Dutch Bros should move beyond broad demographic targeting and instead leverage data-driven customer segmentation. By identifying distinct consumer groups based on psychographic, behavioral, and perceptual patterns, the company can tailor promotions, loyalty programs, and communications that resonate with each segment's unique motivations and expectations.

Research Objectives

This project explores how who customers are, how they think, and how they buy come together to influence how they perceive, and stay loyal to, Dutch Bros Coffee. It will specifically focus on:

1. Identify and profile distinct market segments among Dutch Bros consumers based on lifestyle, motivations, and purchase behavior.
2. Examine how perceptions of brand personality and service quality influence satisfaction and loyalty intentions
3. Develop actionable segment-based insights to guide targeted marketing strategies, communication approaches, and consumer retention initiatives.

Drawing from the STP framework and Consumer Behavior Theory, this research analyzes who Dutch Bros customers are, how they behave, and connect to how they feel about the brand. Guided by Brand Personality and Relationship Theory, it emphasizes emotional drivers like warmth, energy, and community that define the Dutch Bros experience. The goal is to turn these findings into actionable, data-driven strategies that build stronger relationships, boost loyalty, and uncover new growth opportunities.

II. RESEARCH METHODS

In order to address the research objectives and identify customer segments for Dutch Bros Coffee, this study used a quantitative survey-based research design. This method involved collecting data through an online survey questionnaire that measured consumers' attitudes, behaviors, lifestyle preferences, and purchasing habits. This approach allowed for systematic comparison across responses and provided the numerical data needed for segmentation and

discriminant analysis. These analyses were performed in *Enginius*, a web-based, user-friendly marketing analytics platform.

Sampling Method & Sample Size

A non-probability convenience sampling method was used, targeting individuals who were current or recent Dutch Bros customers. This method was appropriate for the exploratory nature of the project and the need to gather data quickly and efficiently from accessible respondents. Participants were recruited through university communication channels, and social groups, ensuring that participants had direct experience with the brand.

The final sample consisted of 32 completed survey responses, consistent with the expected time frame that survey collection allotted. This sample size was sufficient to conduct segmentation using attitudinal variables and to run discriminant analysis for identifying observable differences between clusters. The data supported a two-cluster segmentation solution, with clear differences in attitudes, purchasing behaviors, and lifestyle descriptors across groups.

Analytical Procedures

The survey included attitudinal items (Q9_1–Q9_6), behavioral descriptors (i.e. drink type, purchase method), demographic characteristics, and self-identified lifestyle traits. After data cleaning and standardization, a hierarchical clustering method (Ward's) was applied to the attitudinal variables to understand the natural groupings of consumers. Following initial cluster identification, a discriminant analysis was conducted to evaluate how well behavioral and demographic variables could classify respondents into segments. This allowed the research to be applied from attitudinal segmentation to demographic profiles, useful for managerial decision-making.

Research Limitations

Although the findings offer meaningful insight into Dutch Bros customer segments, several limitations should be considered.

1. **Sampling Limitations:** The use of convenience sampling restricts broader nuances. The sample may not fully capture the broader Dutch Bros customer base across different regions or demographic groups.
2. **Sample Size:** While 32 responses allowed for exploratory clustering, larger datasets could yield more segments. Small sample clusters reduce the robustness of conclusions.
3. **Self-Reported Data:** Survey responses rely on participant honesty and self-reflection, which may introduce inaccuracies or biases, especially regarding spending levels, motivations, or lifestyle traits.

Despite these limitations, the research method is well-suited for an exploratory segmentation project and provides a strong foundation for understanding how Dutch Bros customers vary in motivations, behaviors, and brand engagement.

III. FINDINGS & MARKETING INSIGHTS

Segmentation & Targeting

Segmentation Variables (Bases): To uncover meaningful customer groups for Dutch Bros Coffee, we used six attitudinal variables (Q9_1–Q9_6) as the segmentation bases. These variables reflect customer motivations, perceptions, and values toward the brand and coffee experience.

Code	Question	Measurement Focus
Q9_1	“I see coffee as a key part of my daily routine.”	Routine/Consumption Habit

Dutch Bros Coffee – Marketing Segmentation

Q9_2	“I prefer brands that promote a fun, positive, and energetic culture.”	Brand Personality Fit
Q9_3	“Supporting community-focused or local brands is important to me.”	Community/Local Orientation
Q9_4	“I’m willing to pay more for unique flavor combinations.”	Willingness to Pay for Quality
Q9_5	“I often share my coffee experiences on social media.”	Social Sharing / Engagement
Q9_6	“I prefer personalized service and friendly interactions at coffee shops.”	Customer Experience Value

These six attitudinal items were standardized and clustered in Eugenius using the hierarchical (Ward’s) method. They capture why customers differ — the core of market segmentation.

Discriminant (Descriptor) Variables: To describe and predict the identified segments, we selected observable behavioral and demographic descriptors. These help Dutch Bros identify and target each group in practice.

Variable Code	Descriptor	Type
Q6	Type of drink purchased (iced, blended, energy, etc.)	Behavioral
Q8	Purchase method (drive-thru, mobile order, walk-up)	Behavioral
Q15	Age group	Demographic
Q16	Gender	Demographic
Q23	Lifestyle descriptors (health-conscious, social, creative, etc.)	Psychographic
Visit_Frequency	How often the customer visits Dutch Bros	Behavioral
Spending_Level	Average spend per visit	Behavioral
Motivation_Type	Primary reason for visiting (taste, vibe, convenience, etc.)	Psychographic

Together, these variables form the foundation for segmentation (attitudes) and discriminant analysis (identification and targeting).

Number of Clusters

Two segmentation runs were conducted using Eugenius:

1. **Initial Segmentation (Exploratory Run):**

The first model, based solely on the six attitudinal variables (Q9_1–Q9_6), produced a five-cluster solution.

Although this output revealed several micro-segments with varying preferences (e.g., “Community Loyalists,” “Flavor Seekers,” “Social Sharers”), the clusters were too small. Some clusters contained only one or two respondents, reducing interpretability and practical application.

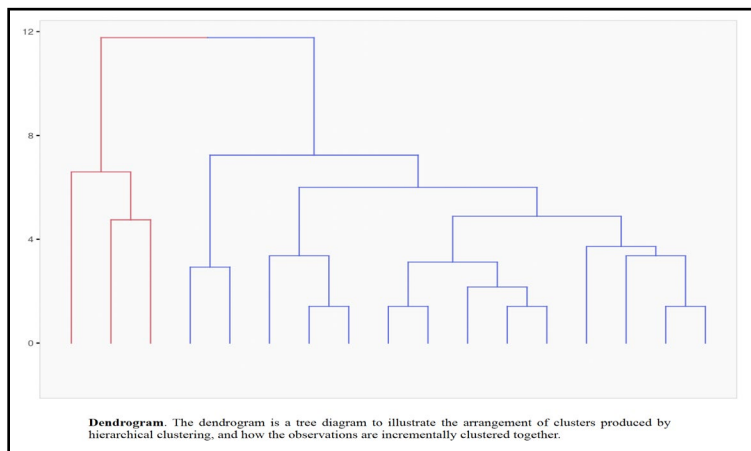

2. **Final Segmentation (Validated Run):**

The second model combined segmentation with discriminant analysis to incorporate descriptor variables (behavioral and demographic factors).

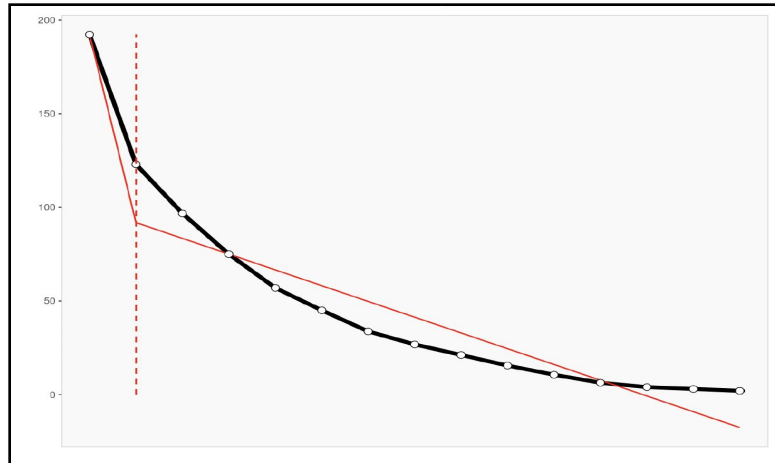

This analysis revealed a more stable two-cluster structure that was statistically supported, managerially relevant, and 100% classifiable using observable characteristics.

Therefore, the two-cluster model was retained as the final segmentation for Dutch Bros.

Final Cluster Solution – 2 Segments

Dutch Bros Coffee – Marketing Segmentation

Segment description			
Segment size			
	Population	Segment 1	Segment 2
Size	17	3	14
Relative size	100%	18%	82%
Segment size.			
Segment description			
	Population	Segment 1	Segment 2
Q9_1	3.8	0.333	4.543
Q9_2	4.29	2.67	4.64
Q9_3	4.18	4.33	4.14
Q9_4	3.47	3	3.57
Q9_5	3.17	2.42	3.33
Q9_6	3.88	2	4.29
Segment description. Average value of each segmentation variable, overall for each segment (centroid). Segmentation variables that are statistically different from the rest of the population are highlighted in red (lower) or green (higher).			

Visual outputs indicate a clear “elbow” after two clusters, confirming that a 2-cluster model effectively captures the underlying structure of the market.

Segment Profiles

Cluster 1 – Low-Engagement Traditionalists (18%)

- View coffee as functional rather than emotional or social.
- Lower engagement across most attitudinal factors, particularly personalization and social sharing.
- Likely occasional or price-sensitive buyers who visit less frequently.

Marketing Implication: This group is a secondary focus. Efforts can emphasize convenience, speed, and value promotions to encourage more frequent visits.

Cluster 2 – Brand-Engaged Loyalists (82%)

- Coffee is a key part of daily life and brand experience.
- High on all positive attitudes: fun culture, community spirit, and personalized service.

Visit frequently, spend more per trip, and actively engage on social media.

Marketing Implication: Core customer base; ideal target for loyalty, community initiatives, and personalized engagement.

Discriminant Analysis

Following the segmentation analysis, a discriminant analysis was performed to determine how well Dutch Bros' customer segments can be classified using observable characteristics (behavioral and demographic variables).

While segmentation identified underlying attitudinal differences, discriminant analysis reveals which measurable traits best separate the groups and allow Dutch Bros to identify each segment in practice.

The discriminant model used a multinomial logit approach, comparing the two previously identified segments from the validated 2-cluster solution:

- 1. Segment 1 – Low-Engagement Traditionalists**
- 2. Segment 2 – Brand-Engaged Loyalists**

Descriptor analysis

Descriptors

This table reports the descriptor averages of each segment. The more differences can be found, the easier it will be to predict segment membership based on descriptors alone.

	Population	Segment 1	Segment 2
Q6Blended drinks (Freeze, Frost etc.)	0.118	0	0.143

Segment Descriptions (Based on Discriminant and Descriptor Findings)

Segment 1 – Low-Engagement Traditionalists (18%)

- Visit Dutch Bros less frequently and spend less per visit.
- Prefer traditional or hot coffee drinks.
- Motivated by convenience and habit, not brand experience.
- Engage less with social channels and community events.
- Likely younger, value-focused, or more pragmatic customers.

Implication: Represents a secondary target, potential to convert into regular buyers through convenience promotions, drive-thru offers, and value bundles.

Segment 2 – Brand-Engaged Loyalists (82%)

- Visit frequently and spend more per trip.
- Prefer iced, blended, and specialty drinks, Dutch Bros' signature products.
- Predominantly 18–34 years old and female-skewed.
- Lifestyle traits include being social, busy, and health-conscious.
- Motivated by the Dutch Bros vibe, fun, community-driven, and personalized.

Implication: This is Dutch Bros' core segment, embodying the brand's energetic and community-focused identity. Efforts should focus on loyalty retention, app-based engagement, and brand storytelling around friendship and community.

Dutch Bros Coffee – Marketing Segmentation

Descriptor Variable	Segment 1 Low-Engagement Traditionalists (18%)	Segment 2 Brand-Engaged Loyalists (82%)	Interpretation
Drink Type (Q6)	Prefer hot or traditional coffee options.	Favor iced and blended drinks, core to Dutch Bros' product line.	Segment 2 aligns closely with Dutch Bros' fun, flavor-oriented brand identity.
Purchase Method (Q8)	More likely to order in person or walk-up.	Heavily use drive-thru, mobile app, and fast service channels.	Loyalists value convenience and accessibility.
Age (Q15)	Primarily 18–24-year-olds.	Mix of 25–34 and early professionals.	Both young, but Segment 2 represents slightly older, stable repeat buyers.
Gender (Q16)	Predominantly female.	Female-skewed but more balanced gender mix.	Brand attracts strong female base, but Segment 2 shows broader reach.
Lifestyle (Q23)	Adventurous, creative, relaxed.	Social, busy, health-conscious.	Loyalists live faster-paced, community-oriented lifestyles.
Visit Frequency	Visit occasionally (avg. = 1.0).	Visit regularly (avg. = 1.5).	Frequency is a major behavioral discriminator.
Spending Level	Lower spending per visit.	Higher spending and willingness to try premium drinks.	Indicates stronger brand commitment in Segment 2.
Motivation Type	Driven by convenience or habit.	Motivated by brand vibe, personalization, and social energy.	Segment 2 engages for emotional and experiential reasons.

Recommendations and Strategy

Based on our findings, Dutch Bros' customer base shows two distinct segments: the Low-Engagement Traditionalists, which represent around 18% and the Brand-Engaged Loyalists, which make up the other 82%. We recommend the company to prioritize the core segment of loyalists and create cross-segment strategies that can also be marketed to the low-engagement consumers. We want to build stronger relationships with our consumer base, boost loyalty, and explore new growth opportunities for the Low-Engagement Traditionalists segment.

Acknowledging that the Brand-Engaged Loyalists consumer segment is already emotionally engaged, respond positively to brand identity and community-building, and have

high repeat purchase potential; the focus is on strengthening engagement and enhancing the experience monetarily and emotionally. This segment resonates with the company's fun, energetic, community-driven identity so leverage social media and encourage consumers to post about their experience, the store, the drinks partner with social media companies to create custom stickers, filters, fun challenges, drink of the week posts and loyalty badges that customers can share on social media. The company can also offer seasonal or limited-time collaborations with artists or movies that can include collectable cups or trinkets that can then be built into merchandise like apparel, beverage appliances, straws, stirrers, mini bags and stickers. Dutch Bro's can promote their partnerships with charitable organizations and highlight their successful fundraising efforts that are local and community based. Both segments appreciate positivity and campaigns like this give loyalists the opportunity to engage with the brand. The brand can partner with and support more causes.

The secondary segment of Low-Engagement Traditionalists view coffee as functional rather than experiential. They are price-sensitive, visit infrequently, and are not motivated by social media or community messaging. While they are not the core loyalty base, they still represent a meaningful opportunity for increasing visit frequency. Dutch Bro's can promote convenience through their mobile ordering and coupons for free items or discounts. Coffee has a high profit margin, so small incentives can be cost-effective while meaningfully boosting visit frequency. The goal is not to change their personality, but simply to encourage more frequent patronage.

The company can also invest in their mobile app and offer personalized app-exclusive discounts or incentives for mobile ordering to encourage Traditionalists through value and convenience, while also appealing to Loyalists who enjoy personalization and digital

engagement. The mobile ordering also gives stores more time to prepare drinks and reduces in-line bottlenecks, improving the customer experience for both segment types especially during peak hours. Loyalists can also be rewarded for their frequency, spend, and engagement behaviors through a tier system that can range from standard rewards to exclusive previews and early access to limited merch drops.

Through data-driven personalization, refined loyalty structures, convenience-focused campaigns, and emotionally resonant brand initiatives, Dutch Bros can strengthen customer relationships, increase CLV, boost frequency, and unlock new pathways for growth.

APPENDIX

Dutch Bros Coffee – Marketing Segmentation Questionnaire

Q0. This study aims to understand customer experiences, preferences, and habits to help improve Dutch Bros’ products, service, and marketing strategies. Your responses are confidential and will be used only for research purposes. Thank you for sharing your time and honest feedback!

Q1. How often do you purchase coffee or similar beverages from a café or drive-thru?

- ☐ Daily (1)
- ☐ Several times per week (2)
- ☐ Once a week (3)
- ☐ 1–3 times per month (4)
- ☐ Never (5)

Skip To: Q15 If Q3 = Never

**Q2. Which of the following coffee brands have you purchased from in the past month?
(Select all that apply)**

- ☐ Dutch Bros Coffee (1)
- ☐ Starbucks (2)
- ☐ Peet’s Coffee (3)
- ☐ Dunkin’ (4)
- ☐ Local independent coffee shops (5)
- ☐ Other (specify _____) (6) _____

Q3. How long have you been a Dutch Bros customer?

- ☐ Less than 6 months (1)
- ☐ 6 months – 1 year (2)
- ☐ 1–3 years (3)
- ☐ 3+ years (4)

- I haven't tried Dutch Bros yet (5)

Skip To: Q15 If Q3 = I haven't tried Dutch Bros yet

Q4. On average, how often do you visit a Dutch Bros location?

- Daily (1)
- Several times per week (2)
- A few times per month (3)
- Less than once a month (4)

Q5. What time of day do you typically visit Dutch Bros? (Select all that apply)

- ☐ Morning (6 a.m.–10 a.m.) (1)
- ☐ Midday (10 a.m.–2 p.m.) (2)
- ☐ Afternoon (2 p.m.–6 p.m.) (3)
- ☐ Evening (6 p.m.–10 p.m.) (4)

Q6. What types of beverages do you typically purchase? (Select all that apply)

- ☐ Iced coffee drinks (1)
- ☐ Hot coffee drinks (2)
- ☐ Blended drinks (Freeze, Frost etc.) (3)
- ☐ Energy drinks (Rebel line) (4)
- ☐ Tea / Lemonade / Other non-coffee drinks (5)

Q7. How much do you typically spend per visit at Dutch Bros?

- ☐ Under \$5 (1)
- ☐ \$5–\$9 (2)
- ☐ \$10–\$14 (3)
- ☐ \$15 or more (4)

Q8. How do you usually make your purchase?

- ☐ Drive-thru (1)
- ☐ Walk-up window (2)
- ☐ Mobile app order (3)
- ☐ Delivery service (4)
- ☐ Other (specify _____) (5)

Q9. Please indicate how strongly you agree with each statement (1 = Strongly Disagree to 5 = Strongly Agree):

	Strongly Disagree	Somewhat disagree	Neither agree nor disagree	Somewhat agree	Strongly agree	
	0	1	2	3	4	5
I see coffee as a key part of my daily routine. ()						
I prefer brands that promote a fun, positive, and energetic culture. ()						
Supporting community-focused or local brands is important to me. ()						
I'm willing to pay more for unique flavor combinations. ()						
I often share my coffee experiences on social media. ()						
I prefer personalized service and friendly interactions at coffee shops ()						

Q10. How would you describe your main reason for visiting Dutch Bros?

- ☐ Taste and quality of drinks (1)
- ☐ Friendly customer service (2)
- ☐ Speed and convenience (3)
- ☐ Brand image / vibe (4)
- ☐ Rewards program (5)
- ☐ Other (specify _____) (6) _____

Q11. How would you rate your overall satisfaction with Dutch Bros Coffee? (1 = Extremely dissatisfied to 5 = Extremely satisfied):

	Extremely dissatisfied	Somewhat dissatisfied	Neither satisfied nor dissatisfied	Somewhat satisfied	Extremely satisfied	
	0	1	2	3	4	5
Rating ()						

Q12. Please rank the following factors in order of importance when choosing a coffee shop (1 = Most important):

- _____ Price (1)
- _____ Taste / Menu Variety (2)
- _____ Convenience / Location (3)
- _____ Customer Service (4)
- _____ Brand Personality (5)
- _____ Sustainability / Ethical sourcing (6)

Q13. How likely are you to recommend Dutch Bros to friends or family?

	Extremely unlikely	Moderately unlikely	Slightly unlikely	Neither likely nor unlikely	Slightly likely	Moderately likely	Extremely likely
		0	1	2	3	4	5
Recommendation ()							

Q14. Select "yes" if you are still paying attention

- ☐ No (4)
- ☐ Maybe (5)
- ☐ Yes (6)
- ☐ I don't know (7)
- ☐ None of the above (8)

Q15. How old are you?

- ☐ Under 18 (1)
- ☐ 18-24 years old (2)
- ☐ 25-34 years old (3)
- ☐ 35-44 years old (4)
- ☐ 45-54 years old (5)
- ☐ 55-64 years old (6)
- ☐ 65+ years old (7)

Q16. How do you describe yourself?

- ☐ Male (1)
- ☐ Female (2)

- ☐ Non-binary / third gender (3)
- ☐ Prefer to self-describe (4) _____
- ☐ Prefer not to say (5)

Q17. What is your ZIP code?

Q18 Which statement best describes your current employment status?

- ☐ Working (paid employee) (1)
- ☐ Working (self-employed) (2)
- ☐ Not working (temporary layoff from a job) (3)
- ☐ Not working (looking for work) (4)
- ☐ Not working (retired) (5)
- ☐ Not working (disabled) (6)
- ☐ Not working (other) (7) _____

Q19. What was your total household income before taxes during the past 12 months?

- ☐ Less than \$25,000 (1)
- ☐ \$25,000-\$49,999 (2)
- ☐ \$50,000-\$74,999 (3)
- ☐ \$75,000-\$99,999 (4)
- ☐ \$100,000-\$149,999 (5)
- ☐ \$150,000 or more (6)
- ☐ Prefer not to say (7)

Q20. What is the highest level of education you have completed?

- ☐ Some high school or less (1)
- ☐ High school diploma or GED (2)
- ☐ Some college, but no degree (3)
- ☐ Associates or technical degree (4)

- Bachelor's degree (5)
- Graduate or professional degree (MA, MS, MBA, PhD, JD, MD, DDS etc.) (6)
- Prefer not to say (7)

Q21. Are you now married, widowed, divorced, separated or never married?

- Married (1)
- Widowed (2)
- Divorced (3)
- Separated (4)
- Never Married (5)

Q22. Choose one or more races that you consider yourself to be

- ☐ White or Caucasian (1)
- ☐ Black or African American (2)
- ☐ American Indian/Native American or Alaska Native (3)
- ☐ Asian (4)
- ☐ Native Hawaiian or Other Pacific Islander (5)
- ☐ Other (6)
- ☐ Prefer not to say (7)

Q23. Lifestyle Descriptors (Select up to 3):

- ☐ Health-conscious (1)
- ☐ Adventurous (2)
- ☐ Social (3)
- ☐ Busy (4)
- ☐ Creative (5)
- ☐ Relaxed (6)
- ☐ Trend-seeker (7)
